

THE FANTASTIC TALE OF PRO-VACCINE QUEEN DOLORES CAHILL

by Omar Jordan (June, 2021)

The following information is a presentation of evidence, combined with **my opinions**, based on factual details available in the public domain. My opinions are based on the evidence. I do not claim to present an overarching or objective truth, and I encourage all readers to engage in their own research by following the links available in this document. It is up to each individual to research for themselves in order to determine whether or not your conclusions align with my assessment and analysis of the evidence. Consider this document a starting point to a larger body of research and more thorough investigation.

Dolores Cahill is an Irish pro-vaccine queen and one of the leading voices of the so-called “anti-vaccine” movement. The [mainstream media](#) refers to Cahill as an “anti-vaccination” advocate and [conspiracy theorist](#), who is spreading medical misinformation. Professor Cahill has a degree in Molecular Genetics and a Ph.D. in Immunology. Let’s take a look at Dolores Cahill’s career and see if the mainstream media’s representation of her is accurate.

[From her Bio:](#)

*Prof. Dr Dolores Cahill is a world-wide renowned expert in [high-throughput proteomics](#) technology development and automation, high content protein arrays and their biomedical applications, including in **biomarker discovery** and diagnostics.*

What is Proteomics?

What are Proteomics used for? Here are a few papers and articles.

[Proteomics for development of vaccine](#)

[Single-Cell Proteomics Tackles Vaccine Development](#)

[Proteomic contributions to our understanding of vaccine and immune responses](#)

[The role of structural proteomics in vaccine development: recent advances and future prospects](#)

[Prioritization of potential vaccine targets using comparative proteomics and designing of the chimeric multi-epitope vaccine against Pseudomonas aeruginosa](#)

[Proteomics and Its Application in Pandemic Diseases](#)

What is Biomarker Discovery? According to Wikipedia:

*Biomarker discovery is a medical term describing the process by which **biomarkers** are discovered. Many commonly used **blood tests** in medicine are **biomarkers**. There is interest in biomarker discovery on the part of the **pharmaceutical industry**; blood-test or other biomarkers could serve as intermediate markers of disease in clinical trials, and as possible **drug targets**.*

[New developments and concepts related to biomarker application to vaccines](#)

So far, just from the first line of her bio, we have learned that Cahill has been involved in working on **vaccine technology** and is connected to the **pharmaceutical industry** through her work on **biomarkers**. Let's continue.

*Prof. Cahill pioneered this research area at the **Max-Planck-Institute of Molecular Genetics** in Berlin, Germany, and **holds several international patents** in this field with research, biomedicine and diagnostic applications.*

Given that she holds several international patents in this field, it is fair to assume that any vaccine company that uses her technology will pay her a lot of money for it. To put it another way, she stands to **profit from the manufacturing and development of vaccines**.

[“The Max Planck Institute for Molecular Genetics](#) is a research institute for [molecular genetics](#) based in [Berlin, Germany](#). It is part of the [Max Planck Institute](#) network of the [Max Planck Society for the Advancement of Science](#)”.

More from her bio:

- *Over 20 years expertise in high-throughput protein & **antibody array**, automation, proteomics technology development & **biomedical applications in biomarker discovery**, diagnostics & personalised medicine.*
- *Since 2005 to present, Full Professor of Translational Science, School of Medicine, University College Dublin, Academic, Researcher, Lecturer, Module Coordinator in Pathology Teaching, School of Medicine & Conway Institute*
- *15 years as Irish, EU & **international expert & advisor including Seconded National Expert to European Commission***
- ***Company Co-founder & Shareholder** (1997-2019) of **Protagen AG** in Germany (<https://protagen.com/>). Protagen Protein Services (2012-2019) contract services to healthcare sector & pharmaceutical industry (<https://protagenproteinservices.com/>).*

[From Protagen’s website:](#)

*Protagen Protein Services (PPS) is a **world leading CRO** and recognized expert for analytical services in protein science regarding characterization, method development, validation and routine testing of antibodies, proteins, **vaccines** and other formats of **biopharmaceuticals**.*

A [CRO \(Contract Research Organization\)](#) is a company that provides clinical trial management services for the **pharmaceutical, biotech**, and medical device industries.

[Here is Protogen’s Vaccine Page.](#)

From Cahill’s Bio:

- *Since 2016, **co-founding shareholder and Advisory Board member** of Prof. Stephen Pennington’s UCD School of Medicine/Conway Institute spin-out company, **Atturos Ltd.** working to improve Prostate Cancer diagnosis (<http://atturos.com/> and <http://atturos.com/company/advisors/>).*

[From Atturos’s website:](#)

*Atturos is a fast growing clinical diagnostics company developing **molecular diagnostic tests** to support better patient decisions. Currently focusing on the identification of **serum protein***

biomarkers, Atturo's uses cutting edge technology in collaboration with key clinical consortia and **big pharma**.

If you scroll to the bottom of their page, you can see some of their Big Pharma partners which include **Merck** and **Pfizer**.

It is interesting that one of the leading voices in the so-called “anti-vaccine” movement co-founded and sits on the board of a company that **partners with Merck, Pfizer and a handful of other Big Pharma companies**. To put it another way, it is in her personal financial interest to make decisions that will benefit companies like **Merck** and **Pfizer as well as her own company, Atturo's, Ltd.**

*Selected Academic Leadership and Contributions: Invited **Speaker, Keynotes**, Conferences organised:*

- Prof. Cahill has given over **100 Keynotes** in USA, Europe, China, Japan, S. Korea, Australia, South America:
- 18th-19th May 2020: **Chair, Global Bioprocessing, Bioanalytics & ATMP Manufacturing, Dublin.**

[What are ATMPs?](#)

Advanced Therapy Medicinal Products (ATMPs) are **medicines** for human use with an active therapeutic substance based on at least one of the following;

- Technology to **modify patient genome**
- Recombinant nucleic acids or genes
- **Substantially manipulated cells**
- Cells intended for a different essential function in the patient versus the donor
- **Engineered tissue**

We can learn more [here](#), in this article by **BioPharm International Editors**.

NHC was announced as a preferred bidder in December 2020 to become one of the initial three centers to provide hands-on training for **advanced therapy medicinal products (ATMPs) and vaccine manufacture** as part of the Advanced Therapies Skills Training Network (ATSTN)—a UK-wide initiative. ATSTN has been awarded funding by the **Department for Business Energy and Industrial Strategy** for the delivery of training centers across the UK that will help to

develop practical skills and address the growing need in **vaccine** and **ATMP** manufacturing. June 2020: **Keynote Speaker, BioTech Pharma Summit, CBB 2020, Portugal.**

Back to Cahill's bio:

- 24th-25th Sept 2020: **Guest Speaker, Biotechnology Business Workshop, British Embassy & Biotech Atelier Sofia.**
- 8th-9th October 2020: **Keynote Speaker, [Global Engage](#), Liquid Biopsies Conference, London.**

From Global Engage's [About Me Page](#):

Bringing Pharma, Biotech, Academia, Technology and Investment Together

Global Engage was founded in 2009 in order to create events that enhance the knowledge pool of the life science industries and engage key stakeholders. We have a particular focus on **drug discovery, biologics, genomic sequencing, agriculture and health technology.**

- 13th-14th February 2019: **Keynote Speaker Companion Diagnostics & Biomarkers Conference 2019**

From [their website](#):

Clinical **biomarkers** and companion diagnostics deliver significant patient benefits, healthcare cost savings, and **revenue opportunities** while providing a foundation for precision medicine. **Pharmaceutical companies are embracing biomarkers** as a way to decrease drug failures in the clinic by streamlining patient selection and stratification. The need for open discussion between **pharma and diagnostics partners** to find common ground, address strategy and technology issues, and **form sustainable partnerships** is at an all-time high. Cambridge Healthtech Institute's Companion Diagnostics and Clinical Biomarkers conference program is designed to bring together **major stakeholders in the field of drug-diagnostics co-development to foster successful science and business strategies** in the rapidly changing healthcare environment.

Cahill's Bio:

- 13th-15th March 2019: **Speaker, Intergovernmental meeting in Bulgaria**
- 10th -11th October 2019: **Chair and Speaker, Immuno-oncology, London** (<http://www.gjiconference.com/gel745785/>)

- *13th-14th September 2018: Speaker, 5th Precision **Medicine & Biomarkers Leaders' Summit**, Munich & Chair of Roundtable on Personalised Medicine & Adverse Events*

Sounds like quite the sorcerer to me. The rest of her bio is also worth a read. I won't hash out the entire bio here, but if we read it in full, we will find that she was also honored with a **lifetime award** from the **Federation of European Biochemical Societies** in Norway for her research, as well as the **BMBF BioFuture Prize by the German Minister of Science**. You can read all about [BioFuture here](#). I am sure you will find it quite enlightening. At this point, I'd like to pause and ask a very simple and reasonable question.

Would the Federation of European Biochemical Societies and German Minister of Science give these awards to someone whom they believed was threatening their business goals? Is it safe to assume that these awards are reserved for only the select few people that actually go above and beyond in not only their own professional achievements, but also their ability to help these entities achieve *their* goals?

It is also interesting to note that Dolores Cahill was [involved in developing a meningitis vaccine](#) in Africa which may have [caused the Ebola outbreak](#).

So far, we have learned (just from her bio) that this person who is known by the majority of the public as a leading voice in the “anti-vaccination” movement – has spent the majority of her career **developing technologies for vaccines and drugs**.

What a hero. With friends like these, who needs enemies?

Obviously, there is no way this person would be allowed to have such a spotlight in the “opposition movement” unless she served the Global Agenda. But we don't have to speculate or rely on unfounded conspiracy theories, we can see it all right there in her bio. So, what else can we learn about Cahill?

Well, how about we take a look at some of the things she has said to see if we can determine what some of her beliefs and opinions are. Let's call [this section](#):

THE FANTASTICAL CLAIMS OF DOLORES CAHILL

*Cahill: "What I want to publicize is, it's well known in immunology, you can take preventive measures to boost your own immune system, so that even if you were a little bit malnourished or rundown, that if you take vitamin D, vitamin C, and zinc, your immune system will be boosted, and also if you eat—good nutrition—so **that if you come across the virus [...]** you will have hardly any symptoms, **you will clear the virus.**"*

Really? And what virus is that? Is there any evidence that such a virus exists? [Of course not.](#) She may as well be talking about the tooth fairy.

*Cahill: "**SARS virus circulated** [since] 2003 and essentially every three or four years since, so that people are **immune**—so that **everybody practically in the world is immune.**"*

How can someone claiming to be an expert in these fields, with such an impressive professional resume – not understand that viruses don't cause disease and there was no "circulation of SARS" or any other so-called viruses, because viruses don't exist? Are these not very basic, elementary concepts? Is she stupid?

*Cahill: "So when they reported in the California study, in the Bakersfield study, with Dr. Erickson, it turned out the percentage [of the population that are **infected with COVID-19** was around 7% right? So globally the people have **antibodies** in general, whether for COVID-19 or not, that would **test positive in these things**—it's between 7% and 15%. But it just means the other people don't have antibodies that are detectable or they don't need to develop antibodies, because they're not **attacked by these viruses** and they don't have any symptoms."*

Viruses can't "attack" anything because there is no such thing as a virus. Has this person not read a single book about the origins and history of virology? How is it that we, mere mortal researchers understand this completely – but this person who has spent her entire career in the field has no idea about this fundamental and foundational concept about [what causes disease](#)?

*Cahill: "Hydroxychloroquine [...] **was shown** [...] by doctors worldwide to be the most efficient **treatment for the coronavirus.**"*

Actually, no. Drugs don't treat viruses. Drugs (allegedly) treat illnesses, disease

and symptoms. Saying that something treats a virus is the same as saying that if you weren't bitten by a dog, you take medicine to treat the dog. But that's nonsense, of course. You take medicine to treat the BITE WOUND. But the real issue here is that drugs don't actually do anything except add toxicity to your body, which **causes illness and disease**.

*Cahill: There's been papers published by the **U.S. Army**, where they have certain flu vaccines in 2017 and 2018 given to soldiers, that when they naturally **come across a coronavirus**, they have a cytokine storm and are severely sick. So it turns out in the vaccines that were given in Wuhan and in Italy, in the Lombardy region, ... these vaccines have been grown on dog tissue and **dog tissues are known to have coronaviruses**."*

Rather than admit and acknowledge that the **unknown toxins in vaccines are causing the illness**, she still insists that the *virus* is actually the source of the illness. And she sources "papers published by the U.S. Army" as a credible source - as if the military is the authority for truth and has an obligation or interest in providing the public with it. The job of the military is to conduct psychological warfare via fear, propaganda and deception.

*Cahill: [Vaccines are] "not safety tested and a lot of the **ingredients that are in vaccines** are known themselves to actually be **bad for the immune system**, like **aluminium or mercury**, so there is absolutely no necessity for those kinds of **toxic ingredients to be in vaccine adjuvants** at all."*

Says the lady who has spent her entire career working for Big Pharma and developing vaccines?

*Cahill: "It's been known for like sixty years that just simple mineral-type oil is plenty antigenic for the body to elicit an immune response, you do not need to be adding in **human DNA**, mercury, aluminium."*

An immune response to what? Oh, right - an invisible thing that nobody has ever seen or proven exists.

*Cahill: "There is no need for social distancing. There are only **three organisms that are transmitted in that way, and it's TB and smallpox and Ebola**, so this one is not. This one is transmitted if a **droplet is on a door handle**."*

Smallpox and [Ebola](#) are SCAMS. Anyone who has done even just a cursory amount of research into Smallpox or Ebola understands this clearly. Neither is

caused by an “organism” and “this one” isn't transmitted by a droplet on a door handle. In order to make such a claim, one would have to conduct valid scientific experiments to prove this claim, which nobody in the world has done. Dolores Cahill is a liar.

*Cahill: What a mask does, it's entirely the wrong thing. It actually reduces the oxygen supply to you, so actually **everybody has latent viruses within their body**, and because you're under oxygen stress, it allows **viruses that were latent—because you're under stress it decreases your immune system.**”*

Do you see how these swindlers operate? They always give you a bit of truth (masks reduce oxygen supply) and then misdirect you with a lie (viruses).

*Cahill: “[COVID-19 patients become] **immune for life** and will no longer transmit the disease.”*

Immune to what? Even if COVID19 was contagious (it's not), and really was caused by a virus called Sars-Cov-2 (it's not), how could anyone in the world know that you would be “immune for life,” when it's only been a year since this started (at the time of her interview)?

But this is just another stupid distraction to get us to believe that people “transmit the disease.” Disease is not contagious.

*Cahill: “Hydroxychloroquine will work for all these types of **viruses**, these **coronaviruses**.”*

What Viruses? Who has a virus? [The CDC doesn't](#), and neither does [anyone else in the world](#). Is this person an idiot? How can this person possibly be considered an expert? Of course she's going to promote HCQ, because she's a DRUG DEALER and a whore for Big Pharma. And if you take HCQ in too high of a dose, guess what will happen? [YOU WILL BECOME DEATHLY ILL](#). Then, this lady will blame your illness on a mysterious new and invisible virus.

*Cahill: In general these [corona]viruses have **30,000 nucleotides** but in this [SARS-CoV-2]—there's actually a stretch of **12 nucleotides that are not present in the other viruses**, and **this would not happen naturally.**” [referencing Anderson et al. Nature Medicine, Figure 1]*

As we can see, she is planting the seed for the suggestion of a “man-made pathogen” using the common, pathetic sleight-of-hand tactics that we are used to. Since there is no natural virus, then there can be no man-made virus. Cahill

can create a conspiracy theory about a bioweapon and then the mainstream fact checkers can come and debunk her lies with their mainstream lies. It's designed this way, and it works effectively.

But how *precisely* could anyone in the world possibly know how many nucleotides are in SARS-CoV-2, without first isolating SARS-CoV-2? And which image does she reference? A silly chart, designed on a computer, which came from the imagination of some scientists who have never observed a virus called SARS-CoV-2.

Yes, her evidence is literally a colorful chart, created in a computer software program. This is how far we have fallen from reality.

Cahill: "The PhD student from this lab [in Wuhan] died and it was at her funeral, it seems, in Wuhan that people started to get the initial symptoms [of COVID-19] after her funeral."

Oh, it **seems so**, does it? What an absurd statement. Should we base scientific discoveries and conclusions on things that **seem** to be a certain way? Or should we be conducting rigorous experiments, with negative control groups, and having those observations and conclusions confirmed by other scientists in a manner that is consistently repeatable?

So what were the details of the funeral story? Who were the people and how many got sick? Do they have names? What sort of symptoms did they develop?

Were they hospitalized? Did they recover? Were samples drawn? Any negative controls? Was toxicity ruled out?

Oh, to hell with all of that red tape ... it **seems so**, let's just go with that.

So, what does Dolores have to gain from her role in the opposition movement, as she "fights" for the people of Ireland? Well, let's have a look at her business dealings.

Doloros Cahill is the Co-Founder of Freedom Airway and Freedom Travel Alliance (FAFTA). [From their website:](#)

*The community we are creating is a group of passionate trailblazers defending freedoms and rights to travel the world. We honor people's right to **travel** freely, embracing cultures, wildlife, **and the environment** while creating **shared economic opportunities**.*

Do you smell a rat? I do. [Here's their Facebook page.](#) Note that they call themselves an Information Technology Company, but they also appear to be in the travel space. Exactly what they do is vague and ambiguous.

*Want to join the community? **Membership starts at \$100 and includes \$200 and \$500 tiers.***

Ahh yes, the inevitable sales pitch. Give your money to Dolores so that she can "fight for Ireland." For those who decide to pay these people (to do what, exactly?), membership will "*bring you into the effort to assure that your family's natural health rights while traveling are protected from injurious regulation and discriminatory policy.*"

I see. Apparently they'll fight for freedom and travel rights, but only for those who pay them. Yes, it's true. They will attempt to help people fly but only the people who pay for membership. So what have they accomplished for the people of Ireland so far? Hint - absolutely nothing.

On their [membership page](#), we can also see that a monthly membership costs \$11.11. They will always throw their occult numbers right in our faces, to mock us.

Recently, FAFTA was also “*looking for 5 ANGEL SHARE Investors to partner with and support our **5 founders in 3 countries on 2 continents.**”*

So, the next obvious question is ... who are the founders (other than Cahill)?

Susan Sweetin/Kevin Jenkins/Tara Thorton are our three American founders and Susan Standfield is our Canadian founder. -[Source](#)

Kevin Jenkins is the CEO of [Global Health Alliance](#). [Here is their Facebook Page](#). Notice that it is almost identical to [FAFTA's Facebook page](#). Listen to [this podcast](#) to learn more about Kevin.

I found 3 people named Susan Sweetin in the United States, but only one with an online presence, and there is no mention of her having anything to do with this organization. Is Susan Sweetin a real person? Where does she live (which state)? You'd think one of the founders of this company would have more of an online presence, perhaps a LinkedIn page or something?

Tara Thorton is an [interesting character](#). She is one of the founders of [Freedom Angels](#). Note how [they stage these events](#) to make “anti-vaxxers” look like “right wing extremists.” The other co-founder is [Denise Aguilar](#) who is connected to undercover (agent) nurse [Erin Olszewski](#) (military special ops) and pro-vax con man **Del Bigtree**. Multiple non-profit organizations appear to be the key vehicle funding Aguilar, Olszewski, and her now defunct and limp partner [Kevin Gene Tuttle](#) [USAF Public Relations]. Please see [Greg Wyatt's](#) long standing detailed research on how these individuals are connected and the operations they are running. It must be understood that these deceivers are not grassroots and do not represent the people. They are controlled opposition agents.

[Susan Standfield](#) is the founder of [Health Justice Tees](#). Here's an interesting [article](#) where she made the news for some controversial T-shirts. [Here's another one](#). If you dig a little, you'll find her doing interviews on all the same radio shows as the Bigtrees, the Sacha Stones, Rocco Galati, Mikki Willis, etc. etc. Same narratives, same boundaries, same “movement” with a lot of overlap. They are all networked together, running an operation.

Amazing how these folks are all connected, isn't it? Do you think that's merely a coincidence? Of course not. The fake “anti-vaccine” movement is a well

organized, highly controlled machine. It is run by military and intelligence.

So now we have already connected FAFTA (which Dolores Cahill is one of the co-founders of) to other pro-vax groups and questionable characters (including Del Bigtree) with military ties in the United States. FAFTA was planning to issue **'Faftacoins'** to members which, presumably, would be redeemable against flights. In March 2021, the FAFTA website advertised a Spring trip to Ireland with the words *"Ready to celebrate Freedom & Saint Patrick's Day in Ireland? Nothing is more Irish than this trip hosting by our very own Freedom Fighter, Dr. Dolores Cahill!"*

If we go to the "Freedom Talks" section of their website (currently), we find an upcoming talk by Kevin Jenkins and Dr. Christine Northrup, of course! All these pro-vaccine goblins promote each other and roll in the same circles, afterall. And here is the blurb associated with that talk:

*At a time when **truth** has been **silenced** & trampled by **big tech** and conglomerate news networks, Freedom Talks is set to provide a platform for our Natural Freedom Audience to be a part of the discussion so we can broadcast **the true opinion of the masses**.*

Did you notice how they just hijacked your opinion in one sentence? These are the folks who will represent the opinion of the masses. Your opinion won't matter, only theirs will. And theirs is a pro-vax, middle of the road voice. None of these people are pro-health and pro-freedom. They all love vaccines. This is something that everyone on planet Earth needs to learn.

Has the truth *really* been "silenced" by Big Tech and Conglomerate News when it comes to people like Dolores Cahill? Have most folks (outside of Ireland) ever heard of her before COVID19? Off to Google Trends we go...

As we can see clearly, the data shows that Dolores Cahill’s popularity saw a huge spike when the so-called “pandemic” started and she has been gaining popularity and fame ever since, just like fellow grifters Mikki Willis, David Martin, Dr. Judy Mikovitz, Rashid Buttar, Del Bigtree, etc. etc. etc. To put it another way, Dolores Cahill is more famous now than she has ever been. More people search for her, more people know who she is, than ever before. So was she *really* censored? Or was she given an artificial boost under the costume of censorship? [Faux-censorship](#), if you will.

We can even say that she’s a household name now (at least in the “truther communities” or what have you). In other ways, we can safely speculate that she is probably also making more money right now than she was before the “pandemic” (donations, speaking tours, membership fees, etc). That’s not including all the money that her companies will make.

In short, if we are speaking strictly from the perspective of censorship, this person has more reach, influence and more of a voice than ever before. If we’re speaking strictly from a financial perspective, the “pandemic” is maybe the best thing that’s ever happened to her.

Irish activist [Gemma O’Doherty](#) had a very interesting audio that exposed Dolores Cahill for the fraud that she is, but that audio has vanished. Gemma’s website and research are hard to find because Google and the rest of the Tech

Giants suppress it. Unlike Dolores, who gets a boost and promotion from Big Tech, real censorship always happens quietly. This is why most people have never heard of Gemma O'Doherty or Greg Wyatt and why Dolores has been handed to us on a silver platter with a strobe light attached to it and a disco ball above her head.

"Are you ready to be a part of something bigger and make an impact on the future of travel, tourism, and freedom!"

Then sign up now and give us your money! Freedom comes at a cost, afterall!

Protagen AG - Co-Founded by Dolores Cahill in 1996, as a spin-out from the Max Planck Institute to *“commercialise her diagnostic, companion diagnostic and personalised medicine applications of her discoveries”*. **She continued to be a shareholder in the company** prior to its sale in 2019. At the time of the sale, Protagen had generated revenue of £1.7 million in the previous three years (2016–2018). [Source](#)

In 2012, Protagen [sold its protein analytical business](#) unit to one of Germany's largest family-owned **venture capital funds**, ZFHN Heilbronn.

[In 2014](#), [Protagen Protein Services](#) merged with **PANATecs**. In their company blurb, they noted in 2008 - *“Panatecs GmbH rescued a Big Pharma blockbuster market authorization by its innovative protein analytical approach.”* **Cahill was also a shareholder at this time** - *“providing contract services to [the] healthcare sector & pharmaceutical industry.”*

[In 2016](#), Protagen announced a collaboration with Novartis AG, a major Swiss-based **multinational pharmaceuticals company**. In June 2020, Novartis signed a strategic partnership agreement with the Massachusetts Eye and Ear and Massachusetts General Hospitals to **produce a Covid-19 Vaccine candidate.**

In 2019, [Protagen was sold to Oncimmune](#) (a leading **pharmaceutical company** in the field of cancer detection) for **£4.1 million, which means Dolores made a lot of money on her stock options.**

So – Professor Cahill who pretends to be fighting ***against*** the vaccine manufacturers and Big Pharma is a pro-vaccine sorcerer who has spent the majority of her career **working for Big Pharma, developing vaccines, and who co-founded a company that earned money by servicing pharmaceuticals**.

She then sold the company to another **pharmaceutical company** and became a **shareholder in that company**, proportionate to her original holding in Protagen AG. Once that company was sold, she walked away with a pile of cash.

In January 2020, she purchased the [White Castle in Athy](#) for €435,000. [Yes, she owns a CASTLE.](#)

She then [got money in the stimulus bill](#) as part of a preservation grant for the castle.

WHAT A HUSTLER!!!

Then, she used some of her profits to launch the [Custodean Project](#) and used the White Castle to host a 'Festival of the Butterfly' [party](#), which of course [made headlines](#) for violating anti-lockdown rules. For the record, I have no problems

whatsoever with people throwing parties in 15th Irish Century Castles. Hopefully they had a good DJ.

What is the Custodean Project, and what was this “Festival of the Butterfly” *really* about? I couldn’t find much online and don’t care to spend too much time on it, but these hustlers always do seem to be starting charity organizations and making lots of money in their humble efforts to save the world and fight for the people, no? You can hear Dolores promoting her project in this [video](#). From the video’s description, “she alludes to the new Custodean Project which, based on her “research document,” will call for an “inquiry” into the deaths of our elderly by criminal medical malpractice during the SARS-CoV-2 emergence.

Ahh yes, another “inquiry” - sign up now and donate to the cause so that Dolores can make her “inquiry.” So here are a few questions. What does this “inquiry” entail? Is it an official document with an official procedure? Are their government officials or courts involved? What does the process consist of? Did anyone go to jail or lose their job as a result of the “inquiry?” What exactly will come from this “inquiry” – well, in case we haven’t learned yet - absolutely nothing. Dolores will continue to make lots of money though, and surely will have more “inquiries” in the future.

Most of my research on these individuals usually uncovers the same patterns and signs of charity fraud, deception, money laundering, etc. Inquiries and lawsuits that go nowhere and people connected to Big Pharma, Big Banking, Big Trees, Big This and Big That – and always making a lot of money.

Enough to buy their own 15th century castle, in some cases.

In case you were wondering, Cahill’s [current net worth](#) is somewhere between \$1 - \$5 Million. Those figures are as of December, 2020, 3 months before she bought the castle. Not too bad for someone who claims to have been “censored” and is “fighting the establishment.” Also note, based on the information above, Cahill profits **from diseases and pandemics**. If diseases and pandemics disappeared tomorrow, she would lose a lot of money. You could say (from a financial perspective), that she (and her employers) might have an incentive to not only *hope* for diseases and pandemics but to maybe even *create* them out of thin air, just for profits. That’s mere speculation, of course.

If you'd like to join the Custodian Project, membership starts at €100 per year, and there is also a 'family/business membership' program. Who knows exactly what they're doing – it all sounds innocent enough for now, but I'm sure if I spent more time digging, I would find even more damning information about this deceiver.

As noted in a [previous paper](#), pro-vaccine queen Dolores Cahill is also [running](#) for political office in Ireland now. Do you think that this woman, who has spent her **entire career working for Big Pharma, developing vaccines**, is actually fighting against the interests of Big Pharma and **for** the people of Ireland? Of course she's not! She's a sub-par thespian and a pawn for globalists, engaged in deception. She is *employed* by the very same people she pretends to be fighting *against*. You can [watch these](#) grotesque [theatrics](#) she participated in recently to verify this. It should be clear to anyone with even only an ounce of discernment that these are nothing but third-rate, pathetic staged acts for public consumption. She is nothing but a duplicitous actress involved in an elaborate con. Pay special notice to the part where she actually accuses the guard of rape. This is how they discredit those of us in the health and freedom movement who are sane, normal people. They do it by associating us with lunatics like this woman.

In that third video, notice the professional camera work and audio. Also take note of her "American campaign manager." These folks are all calling plays from the same playbook, and they're all on the same team as the bad guys. The facade of "good guys" vs "bad guys" is nothing but [kayfabe](#). They run the same marketing and PR campaigns and manipulate the public into supporting their "causes," "organizations," and political aspirations. But do they ever accomplish anything? All I see are more and more vaccines. Dolores will make them *safer* though, so let's put our trust in her and send her more money!

The technocratic globalists put their false opposition minions in political office so that the people will feel a sense of victory, and have their faith in the political system restored. No need to file my own lawsuit or organize my community to stand up and fight, Dolores is on the case!

The public will remain docile and complacent because they think that these people are allies – fighting the system, demanding answers, filing lawsuits and

going after corruption. Nonsense. It's an intricate ruse (albeit a transparent one).

When was the last time any of these psychopaths went to jail for crimes against humanity? Think about that for as long as you need to. The best way to control the opposition is to lead it yourself.

We can see the clues clearly throughout these videos, such as when she says:

“Let me in, I want to go into this building...” clearly hamming it up for the cameras with overacted and contrived antics.

Or another time when she talks to one of the “guards” .. .“Anyone who dresses up as a guard...”

...meaning, he's not a *real* guard, he's an actor, dressing up in a costume ... and his name is **Hugh Shovelin!** That's right, they're “shovelin” it right in our faces.

Now, if you don't understand that these are staged theatrics as part of a psychological warfare operation, pay very close attention to the way this “Hugh Shovelin” speaks and acts, and watch his body language. Also note that he's basically the only one of these guards that interacts with her. Ask yourself if these are the mannerisms and dialogue of regular people, having normal conversations and interactions, or if they seem more like a rehearsed production.

Watch all of the details in these videos and you will undoubtedly pick up a few things. Note the way it all *feels* rehearsed, and the production quality and strategy of the whole thing. Pay attention to the details of the cameras, the movements of the people and the way they speak.

To recap - One of the world's “leading voices” in the anti-vaccine movement is a woman who has spent her entire life developing vaccine technology, winning multiple pharma awards, giving numerous high profile and prestigious Keynote Speeches at **Big Pharma** and **Biotech** conferences, and who co-founded a pharma company that partners with **Merck** and **Pfizer**, co-founded another company develops **vaccines**, and is a world leading CRO that provides clinical trial management services for the **pharmaceutical and biotech industries**.

That company (Protagen) also announced a collaboration with another company (Novartis), in 2016. She remained a shareholder in Protagen until 2019 when the company was sold. The following year, Novartis produced a COVID19 vaccine candidate.

Also, Cahill has made a lot of money from the sale of shares in pharmaceutical companies that make **vaccines** and **drugs** and has ties to other pro-vax undercover military operations in the United States. She also used some of her pharma money to buy her own castle and naturally has set up multiple organizations to “help humanity” and steer the “anti-vaccine” movement into an acceptable, dumbed down, soft-serve level of dissent, which she profits from as well.

And the mainstream media calls her an anti-vaccination activist. 😂

What they *are* correct about, however, is that Dolores actually *is* a conspiracy theorist and she *is* spreading medical misinformation, **on purpose**. By continuing to lie about viruses and all things virology, Dolores is participating in a conspiracy theory – the conspiracy theory that suggests that mother nature conspires to kill human beings via “deadly pathogens” that nobody can see or prove actually exist. Cahill *is* spreading medical misinformation by subscribing to these superstitions and worshipping in the holy Church of the religion of Germ Theory.

That’s how the fact-checkers can get away with their shenanigans. They trick us by wrapping up some of the truths with lies, and vice versa. Then they can come in and debunk her claims while causing mass confusion and division, which she can respond to by claiming “censorship!” – thereby garnering her more attention which leads to more money for her “cause.” A fabulous and cunning scam, if there ever was one.

At the same time, they can easily discredit all of the opposition, just by associating us with an insane person like her. At the end of the day, they all agree with her about viruses, contagion and Germ Theory – and that despite *some* injuries and deaths with this *new experimental* vaccine, *most* regular vaccines are *generally* safe and effective, thus further legitimizing Big Pharma and the vaccine industry and normalizing vaccines in general. These are the lies

that they all protect together and the ultimate gates that they are guarding. Cahill is just pretending to be in opposition to the mainstream, in the same way that Macho Man Randy Savage pretended to “hate” Hulk Hogan. The public thought it was all a real feud, and they had a cold beer together, behind the curtain, after the show was over.

“Cheers for a job well done, we sure pulled one over on them tonight, brother!”

Could Ireland not find someone better suited and more qualified to lead the true, grassroots health and freedom movement, someone who actually represents the real voice of the Irish people? Someone who, I dunno – hasn’t worked for Big Pharma developing vaccines for most of her life? Maybe someone who is opposed to vaccination all together?

You know, someone other than Cahill who is clearly a hardcore **proponent and champion** of vaccines and has worked for pharma companies, profiting handsomely from the sale of vaccines for her entire career? Honestly, I’m not sure I can think of anyone **less** qualified to lead the opposition movement in Ireland.

Do we judge people by the words they say or by their current and past actions and achievements, professional and personal? What tangible results has Ireland seen from Cahill’s efforts – other than perhaps a meaningless, symbolic bone thrown to them once in a while, for optics – and more vaccines? Anything? Of course not.

Hopefully we can all acknowledge (given the evidence) that Dolores Cahill is at the very least – an unqualified and inappropriate person to lead the resistance movement in Ireland, and more egregiously – working for intelligence agencies and globalists. Intelligent Irish people understand that there is no such thing as a safe vaccine and surely deserve someone without the types of revolting conflicts of interest that Dolores Cahill has – someone who will represent them admirably.

Personally, if I saw her on the street, I would turn around and run in the opposite direction, as fast as I could. I certainly wouldn’t let this demon anywhere near my children or pets, or even near my plants – let alone trust her to represent me in government or anything health related – given her extreme ignorance on the

basics of virology and vaccines and her glaringly obvious financial conflicts of interest.

By promoting nonsensical, outdated medical mythology, Cahill (like all others of her ilk) has exposed herself as a simpleton who is living in the dark ages, in regards to understanding the basics about health and what actually causes disease. Given these unavoidable basic facts, there is absolutely no reason for anyone to listen to this necromancer for valuable medical information, or look up to her as a “thought leader,” “expert,” or “health advocate” for the people.

That’s just my opinion, and you are free to disagree, of course.

UPDATE

Dolores Cahill has just announced her latest business venture - [The World Freedom Alliance](#). This website confirms that Dolores Cahill is a shareholder in companies that profit from vaccine manufacturing. If Dolores wants to be taken seriously as an advocate for health, shouldn’t she dissolve herself from these conflicts of interest? Doesn’t she have enough money laundering operations running already?

I’m sure her defense will be that the main opposition is the *new* experimental vaccines but that normal vaccines are generally safe, you see. That’s the deception these people are involved in. It’s an elaborate ruse to get us opposed only to the “unsafe” experimental vaccine, so that the “safe” vaccines will seem like a worthy and safe, alternative choice in comparison and thus normalized.

THE BOTTOM LINE - THERE IS NO SUCH THING AS A SAFE VACCINE

This is the undeniable truth and the elephant in the room that all of these Pro-Vax virus lovers continue to ignore. Why isn’t there a single leader in the so-called “anti-vaccine” movement who is truly 100% against all vaccines and admits that there are no such things as viruses?

Because they are all running an elaborate operation to hide the truth. They can’t admit that these viruses don’t exist because if they do that, then they also must

admit that the entire concept of a vaccine is a lie, which stops the gravy train right in its tracks.
